| **Department of Homeland Security** — Identity Credentialing & Access Management PMO Access Lifecycle Management |
| VariQ provides all phases of system design and development through deployment to ensure DHS IT solutions will enable users to meet mission goals and objectives. Specifically, we support Proof of Concept (POC) development, requirements definition and analysis, concept development and planning, and system engineering for Access Lifecycle Management (ALM) Pilot. |

| **DHS — United States Citizenship and Immigration Services** — Verification Information System, Operations & Maintenance |

| **Symantec — Business Critical Services (BCS)** |
| VariQ is a specialized Symantec BCS provider. In this role we service the enterprise security requirements of customers in Commercial, Federal, and State accounts. VariQ supports Symantec in offering advanced business critical security support in technologies such as Data Loss Prevention, Endpoint Protection, SIM, Control Compliance Suite, and other Symantec products. |

| **DHS — Technology Integration Program** |
| VariQ provides technical subject matter expertise on a wide spectrum of cyber-security related matters for the new DHS St. Elizabeth HQ campus that will have a total of 14,000 personnel upon completion. |

| **United States Congress** — Cyber Security Support Services |
| Beginning in 2004, VariQ has designed the implementation and O&M of antivirus, firewall, and IPS solutions for more than 12,000 systems across over 460 geographically dispersed locations. |

| **Bureau of Engraving and Printing** — IT Cyber Security Services |
| VariQ provides on-site technical, analytical, and program management support to include certification, compliance and audit evaluation, continuous monitoring, IT security event management, and security assessment support for new and existing systems, major and minor. |

| **Consumer Financial Protection Bureau** — Cybersecurity & Program Analysis Support Services |
| VariQ provides cybersecurity program management, risk management, and operational security monitoring and analysis to a variety of projects and programs within the Technology and Innovation Office. |

| **FDIC** — Security Engineering |
| VariQ provides security engineering and SME support with the McAfee suite of security solutions including ePolicy Orchestrator (ePO), Agent, VirusScan Enterprise, Move AV, VirusScan Enterprise for Storage, Security for Microsoft Exchange, and Host IPS. |

### About VariQ

Founded in 2003, VariQ is an award-winning Information Technology and IT Security Services company with a focus on Federal, State, and Local Government departments and agencies. As a fast growing small business, we design, implement, and manage secure IT solutions for today’s complex and dynamic client enterprises. Our core competencies are in Cyber Security, IT Infrastructure, and Software Development.

VariQ is a CMMI Level 3, ISO 9001:2008, ISO 20000-1:2011, and ISO 27001:2013 certified company. Our commitment to quality, IT service, and information security is embedded in our company’s culture and established Quality Policy:

**We will achieve client satisfaction by continually improving processes, responsiveness, and services that exceed client requirements and expectations.**
