CLIENT / DESCRIPTION OF WORK PERFORMED:

NATIONAL INSTITUTE OF HEALTH — Microsoft Premier Support & Microsoft Consulting Services

VariQ developed RedSky, a new information exchange and collaboration platform for the Office of Public Health Preparedness and Response (OPHPR) Situation Awareness Branch. RedSky's dashboard provides CDC executives with situational awareness and decision support pertaining to public health threats (e.g. Ebola outbreaks) and emergency response operations.

INTERNAL REVENUE SERVICE — Security Risk Management

VariQ integrates collaboration tools such as MS SharePoint and Lync communicator to enable strong project communication in virtual and on-site team environments. Team members across the country collaborate on complex work products, all of which are stored and shared using a SharePoint site that is well-organized and easily accessible.

NATIONAL HEART, LUNG, AND BLOOD INSTITUTE — Azure Environment Configuration & Sharepoint Management

VariQ assisted in building an NHLBI Azure environment that supports continuous delivery of software, and is a Continuity of Operations Plan (COOP) platform. VariQ assisted with setting up SharePoint in Azure and performing daily administration tasks and migrations to SharePoint 2016.

CENTER OF DISEASE CONTROL — Import Permit Select Agent System (IPSAS)

VariQ developed IPSAS to encompass both on-premises and cloud environments: an Azure-based development environment, an Azure government-cloud test environment, and an on-premises production environment. We designed a cloud to on-premises release management strategy to seamlessly promote the application through each life-cycle phase.
